

Orange Star Anti-Air instructions

step 1

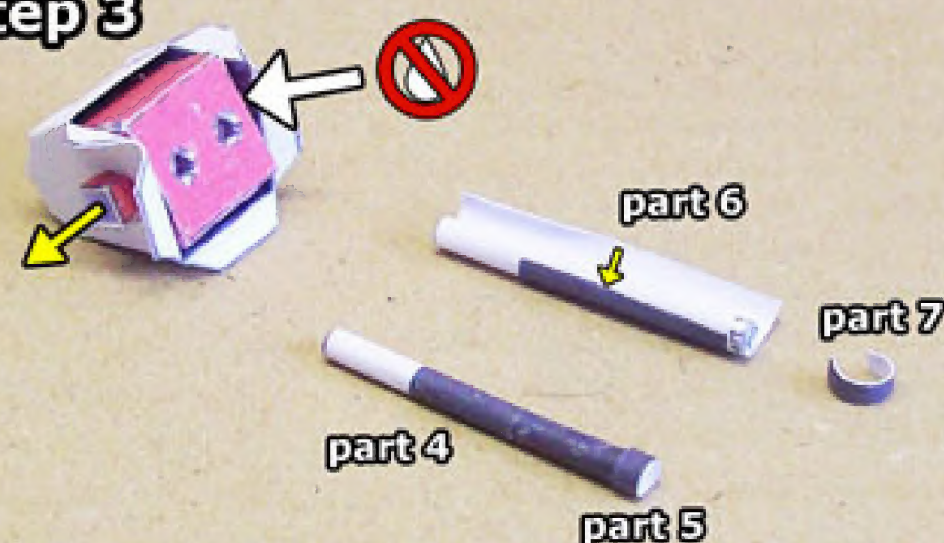

For the best results, print the parts on thicker paper (like 200 gsm). To cut out the parts, you will need a sharp knife, and to glue them together, you will need... glue. A toothpick is helpful for pre-shaping small parts and reaching inside when your fingers are too big, and a rubber cutting mat protects your table top.

step 2

Cut out all the holes on parts 1-3, pre-shape and fold them and then glue them together as shown here (part 1 with the coloured side in!)

step 3

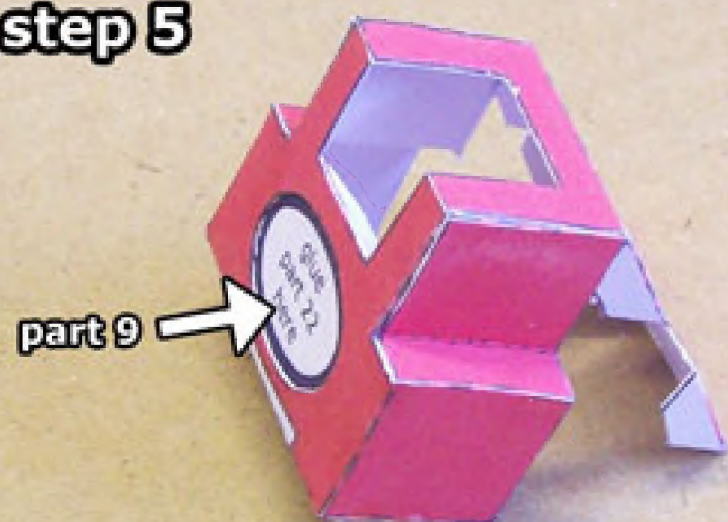

Now place part 2 inside part 1, aligning the holes, but **DON'T GLUE** them together!! Then push part 3 through the holes as shown here. Then roll up and glue parts 4 and 6 as tight as possible, and wrap parts 5 and 7 around the ends.

step 4

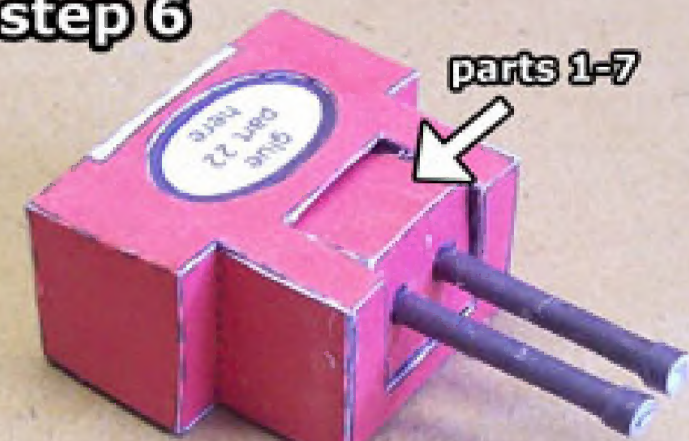

Apply some glue, and then push parts 4+5 and 6+7 through the holes on parts 2 and 3 (inside part 2).

step 5

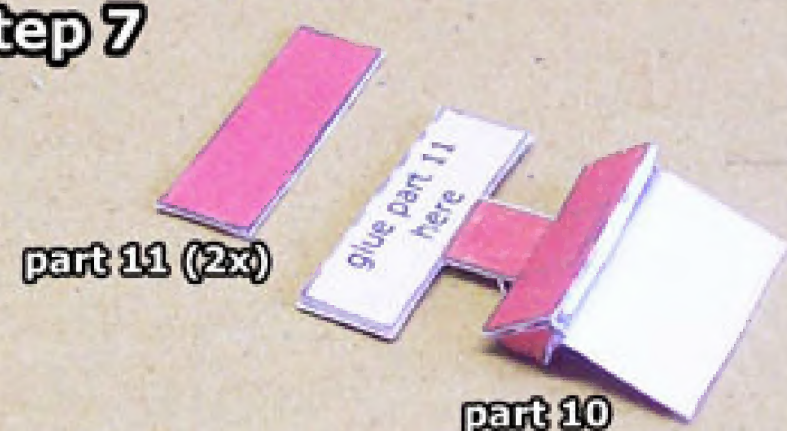

Cut out and assemble but part 8, but **DON'T CLOSE** the bottom yet!! First, glue part 9 underneath the big hole on the top as shown here...

step 6

...and then glue the guns (parts 1-7) underneath the big hole at the front as shown here.

step 7

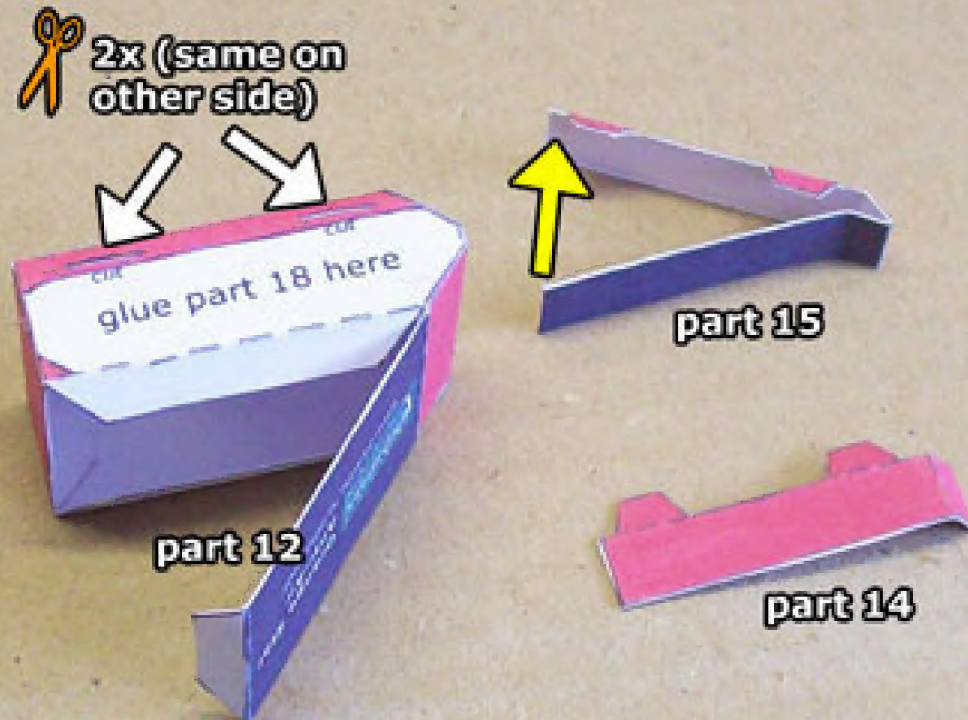

Take your time to pre-shape part 10 and then glue on parts 11 as indicated on part 10.

step 8

Then glue part 10 to the back of part 8 as indicated.

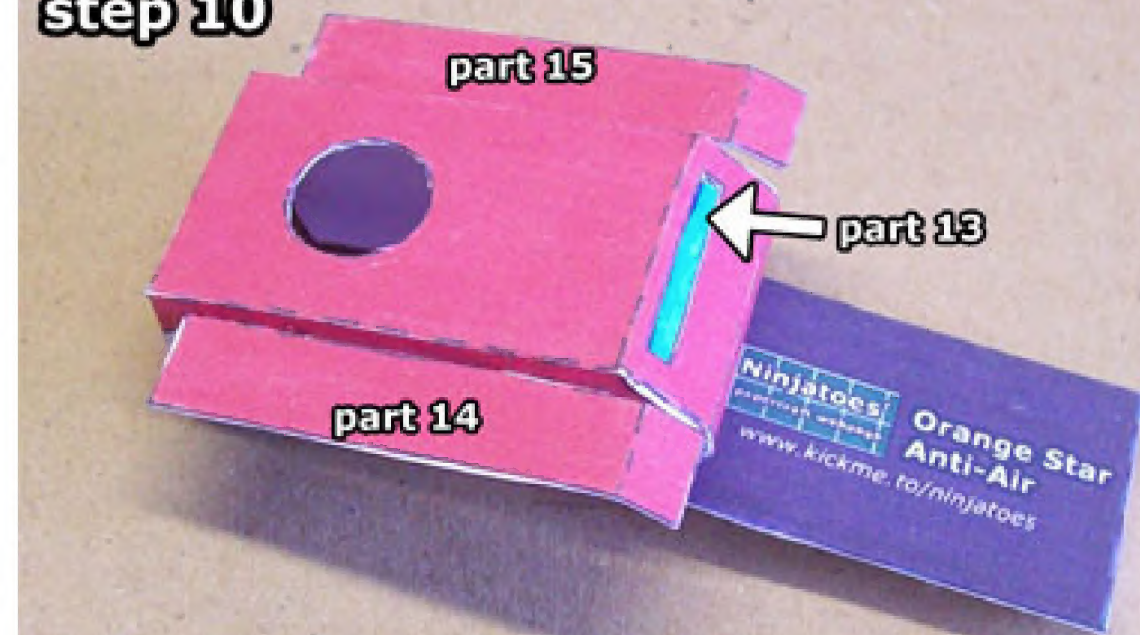

step 9

Cut out the holes and the 4 slits on part 12. Then glue it together, but **DON'T CLOSE** the bottom yet!!

Glue part 13 underneath the rectangular hole at the front and then cut out, pre-shape and glue together parts 14 and 15.

step 10

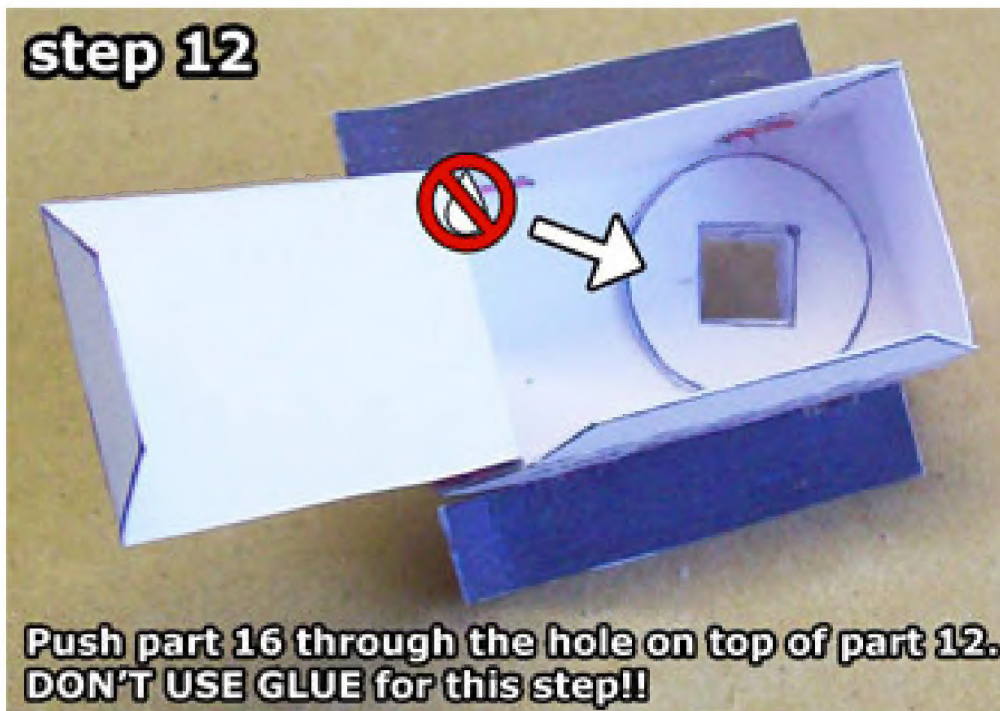

Glue parts 14 and 15 to the sides of part 12 by pushing the red glueing tabs through the slits and folding them down. **DON'T GLUE** the bottom yet still!!

step 11

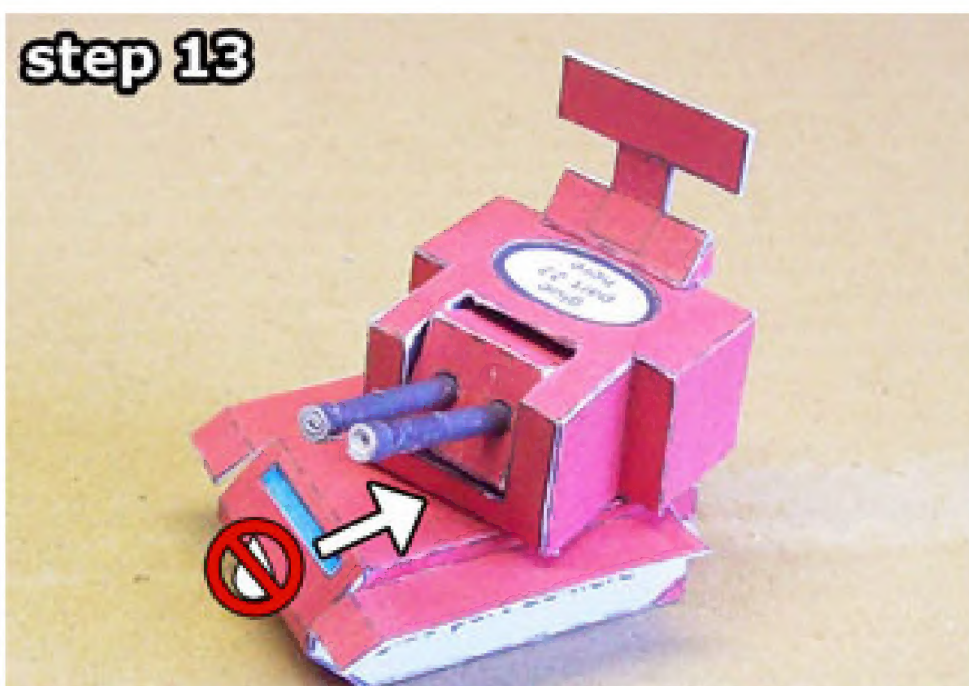

Cut out and glue together part 16. Slide one part 17 over the top, and glue one part 17 to the bottom, sandwiching the glueing tabs on part 16 as shown here.

step 12

Push part 16 through the hole on top of part 12. **DON'T USE GLUE** for this step!!

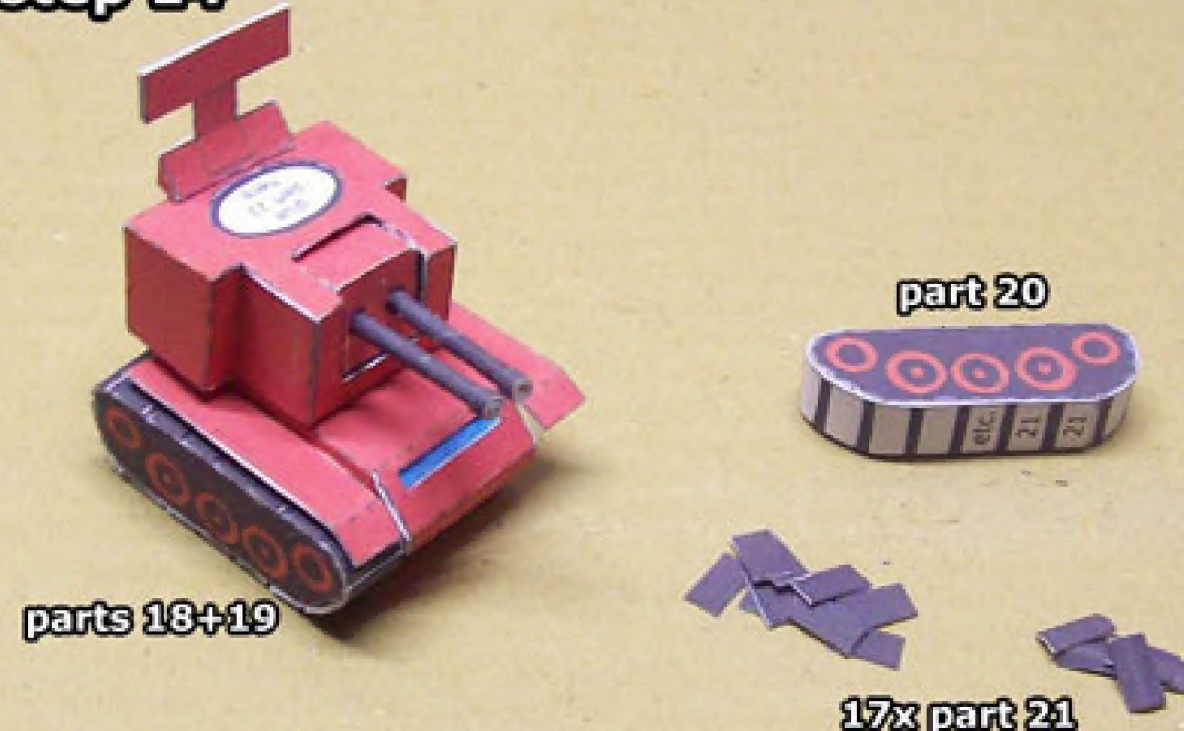

step 13

Now glue the gun turret (parts 1-11) over part 16, but make sure you don't accidentally glue the turret to the hull!

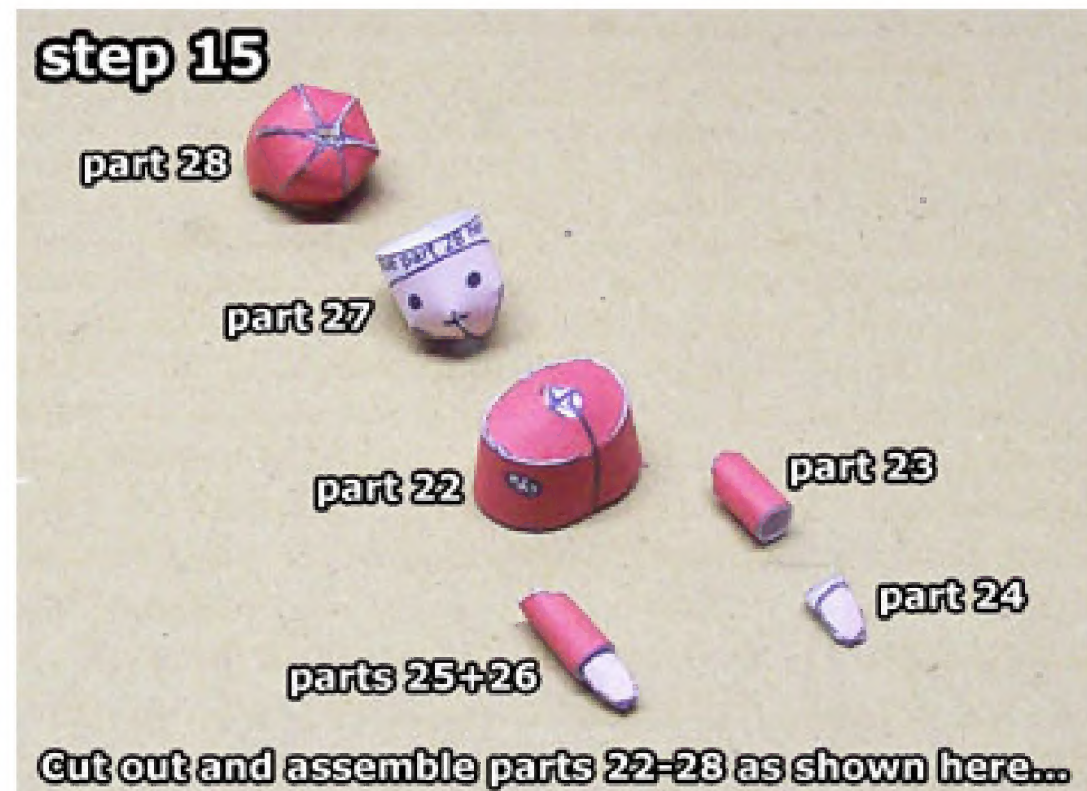

Make sure you close the bottom of part 12 last, so you can still reach inside for this step!

step 14

Now cut out and glue together parts 18-21. Gently pre-shape some of the parts 19 and 21 to make it easier to glue them to the curved sections of parts 18 and 20. Then glue the treads to the hull as indicated.

step 15

Cut out and assemble parts 22-28 as shown here...

step 16

...and then glue them together and glue the little soldier on top of the Anti-Air unit.

Thank you for building a Ninjatoes' papercraft model!
